Introduction

1. The Applicant Issuer's MOI may be drafted in any language, however the Issuer must also have one version of its MOI drafted in English which must be available on the Website.
2. There must be no provision in the MOI of the Issuer or of its Subsidiaries that conflicts with or is less stringent than the Debt Listing Requirements and that prevents the enforcement of the Debt Listing Requirements. If there is such a conflict or less stringent provision then the Applicant Issuer must ensure that the MOI of the Applicant Issuer and / or its Subsidiaries be amended to comply with the Debt Listing Requirements. The onus is on the Applicant Issuer to ensure compliance with this provision before lodging an application for Listing its Securities.
3. Nothing prevents an Applicant Issuer from imposing more stringent provisions in its MOI.
4. 4AX shall be entitled to take action against the Applicant Issuer in terms of the Debt Listing Requirements in the event of non-compliance with the Debt Listing Requirements.
5. Security holders cannot ratify any action of the Applicant Issuer or its Subsidiaries if such ratification would lead to an action inconsistent with or less stringent than the provisions of the Debt Listing Requirements.
6. Nothing in the MOI of the Applicant Issuer or its Subsidiaries shall relieve the Applicant Issuer from compliance with the Debt Listing Requirements.
7. 4AX retains the discretion, subject to the provisions of the FMA and any applicable administrative laws, to reject an Applicant Issuer's MOI if any of its provisions are unlawful, unreasonable or against public policy.
8. The MOI must comply with the Companies Act, or other equivalent legislation applicable to an Entity that is not a "company" as defined in the Companies Act.
9. Securities must be freely transferable unless 4AX and the Registry approve of a restriction and such restriction must be provided for in detail in the MOI and as a minimum the following must be provided in the MOI:
 - 9.1. applicable to all Securities of that class issued or proposed to be issued;
 - 9.2. is objectively determinable without ambiguity and uncertainty;
 - 9.3. is legally permissible; and
 - 9.4. is unconditional, or where subject to any condition, such condition is objectively determinable without ambiguity and uncertainty.
10. All authorities to sign transfer deeds granted by the holders of Securities for the purpose of transferring Securities that may be lodged, produced or exhibited with or to the Applicant Issuer at any of its transfer offices shall, as between the Applicant Issuer and the grantor of such authorities, be taken and deemed to continue and remain in full force and effect, and the Applicant Issuer may allow the same to be acted upon until such time as express notice in writing of the revocation of the same have been given and lodged at the Applicant Issuer's transfer offices at which the authority was lodged, produced or exhibited. Even after the giving and lodging of such notice, the Applicant Issuer shall be entitled to give effect to any instruments signed under the authority to sign, and certified by any officer of the Applicant Issuer, as being in order before the giving and lodging of such notice.
11. For Securities to be transferred, the Securities must be uncertificated.

5. The construction of the Index, including the treatment of various corporate actions (where applicable), must be clearly documented in the ground rule document which must be available on the Issuer's Website and must ensure that the following principles are adhered to:
 - (a) the basic constitution of the Index and the treatment of all known corporate actions (where applicable) must be clearly disclosed to ensure that such corporate actions are dealt with timeously, objectively and consistently;
 - (b) details of Index reviews and their intervals must be clearly disclosed;
 - (c) the ground rules must ensure that the Index is free of any type of manipulation by the Index Calculator or the Issuer;
 - (d) details on the process involved when there are changes to the Index, including but not limited to any corporate action and how these changes will be communicated to Investors;
 - (e) Index methodology must be clear, easily understandable and provide details of the calculation method, constitution, Index rules, Index review, changes to the Index and the consequences of any changes in the Index methodology;
 - (f) the use of sole discretion by the Index Calculator should be limited to avoid any unnecessary movement in the market and advance communication by the Index Calculator with the market is imperative;
 - (g) the mathematics applied in the Index must match the written description of the Index;

- (h) the Index must be to enable Investors to achieve the same returns as the Index in the open market replicable as far as practically possible;
- (i) any changes to the Index or corrections to the Index data in the event of erroneous distribution of data must be published on the Issuer's Website and announced on the 4AX News Services Immediately enable Index users to be able to replicate the Index as far as practically possible;
- (j) a clear policy must exist in terms of how corrections will be published and dealt with;

Terms referring to the pricing methodology must be included (i.e. transaction-based, spread-based or interpolated / extrapolated); and
- (n) if any expert judgement was used in establishing an Index, a brief explanation of the extent to which and the basis upon which such expert judgment was used.

Experience and continuity

6. The Index Calculator must have adequate experience in calculating Indices. 4AX will consider the following principles in satisfying itself whether an Index Calculator has the required experience:
 - (a) the Index Calculator is expected to have sufficient, competent staff with considerable, relevant experience which includes the calculation of in-house benchmarks, custom Indices or having worked with or been employed by an acceptable Index Calculator for a considerable period; and
 - (b) the Index Calculator must prove that it has enough knowledge, experience and a track record in dealing with the impact of corporate actions on Indices.
7. Arrangements must be in place to ensure that a sufficient number of experienced staff are available to properly discharge the Index Calculator's responsibilities at all times. If the Index Calculator does not have the necessary staff to fulfil this obligation, it must have alternative arrangements in place to ensure continuity at all times. 4AX will consider the following guidelines in determining whether the alternative arrangements are acceptable:
 - (a) the Index Calculator must have an agreement in place with another Index provider that will take over its responsibilities in the event of the Index Calculator not being able to discharge its responsibilities for whatever reason; and

- (b) the Issuer must make arrangements, subject to the approval by 4AX, to ensure the proper discharge of the other Index Calculator's responsibilities at all times.

Independence

- 8. An Index Calculator must not act as an Index Calculator to any organisation or fund of which it is not independent except with the specific approval of 4AX and the Index Calculator must be able to demonstrate to 4AX that it can act in a neutral and objective manner without any undue influence from the Issuer or its associates. 4AX will consider the following principles in determining whether to allow an Index Calculator to act for an organisation or fund from which it is not deemed to be independent:
 - (a) the department that is responsible for calculating the Index must operate separately from the Issuer of the Security;
 - (b) the department responsible for calculating the Index must not have any reporting lines into the department responsible for issuing the Security;
 - (c) the compliance officer of the organisation must confirm in writing that the two areas are sufficiently independent and separated to ensure that the one department is not influenced in any manner by the other;
 - (d) a policy must be in place stipulating how matters will be dealt with that are not covered in the ground rules and this policy must ensure that decisions are taken without any consideration to the Issuer of the Security and at all times in the best interest of Investors; and
 - (e) disclosure about the relationship must be disclosed in the Listing documentation together with details on the Index Calculator's ability to act independently.

Technology

- 9. The Index Calculator must demonstrate to 4AX that it has a robust Index calculation system in place. 4AX will consider the following principles in determining whether the system is acceptable:
 - (a) a process must be in place to prevent manipulation of the Index system. Confirmation of this must be provided to 4AX and the Issuer of the Security must confirm that it is satisfied with this;
 - (b) the system must have regularly tested back-ups; and
 - (c) the technology being used must ensure continuity with proper automation and data feeds in the event of a system failure.

Continuing Obligations

- 10. The Index Calculator is approved based on the information presented to 4AX with the initial application and in the event of material changes, 4AX may reassess the initial application. In order to maintain standards on a continuing basis, the Issuer must notify 4AX Immediately of any

significant changes including:

- (a) any changes to the Index Calculator's staff or other external service provider responsible for calculating the Index;
- (b) any changes to its technology; and
- (c) any changes to the relationship between the Index Calculator and the Issuer and its associates.

Other

- 11. 4AX may allow the listing of securities which track or reference the performance of a specified security, Index, or other assets, which include, but are not limited to, Indices, commodities, currencies or any other asset acceptable 4AX. Issuers must ensure that 4AX is consulted well in advance regarding the acceptability of a particular security prior to the proposed issue date.
